🔗 Portfolio

👤 Profile

I am a Software Engineering student with experience in Java, JavaScript, C#, Blazor, and Python. I am passionate about creating intuitive front-end interfaces and developing efficient backend systems to build seamless, user-friendly web applications. My coursework includes Data Structures, OOP, Networking, Web Development, and Database Systems. I have hands-on experience with technologies like HTML, CSS, React, JavaScript, Blazor, and C#. I am a quick learner who enjoys exploring new technologies and applying my full-stack development skills to real-world projects. Currently, I am seeking an internship or student job to further enhance my knowledge and contribute to impactful solutions.

🎓 Education

2023 – present
Horsens, Denmark

VIA University Horsens

- Studied design patterns and applied MVVM, Observer and Singleton in a restaurant table booking system.
- Gained knowledge of SOLID principles and ensured maintainable and scalable code in Java projects.
- Explored algorithms and data structures to optimize performance in database queries and data handling.
- Currently expanding knowledge in DevOps, TypeScript, React, machine learning in Python, and C programming

📁 Projects

Portfolio Website [🔗](#)

Personal Project

- Built a personal portfolio website to highlight my skills, projects, and achievements.
- Technologies Used: HTML, CSS, JavaScript, Bootstrap
- Highlights:
 - Smooth and interactive user experience
 - Fully responsive design adaptable to all screen sizes
 - Integrated GitHub projects for live code access

Inventory Management System [🔗](#)

VIA University, 3rd Semester Project

- Developed an inventory management system as a 3-tier application to manage stock, suppliers and orders efficiently.
- Technologies: Blazor, Java, C#, PostgreSQL, GitHub.
- Key Features: Real-time inventory tracking, role-based access, automated stock updates and reporting system.

- Role: Full-stack developer, created the presentation layer using Blazor, the application layer using Java and the data tier using C#.
- Followed Agile methodology for development.

Restaurant Management System

VIA University, 2nd Semester Project

- Developed a digital solution for restaurant operations, focusing on table reservations, menu management, and order tracking.
- Technologies: Java, JavaFX, PostgreSQL, RMI, GitHub.
- Key Features: Table booking, menu browsing, food ordering, and customer management.
- Role: Full-stack developer, used Scrum for project management, implemented design patterns like MVVM, Observer, and Singleton.

Bob the Builder Web and File Management System

VIA University, 1st Semester Project

- Developed a web system and file management solution for a construction company, focusing on project tracking and client interaction.
- Technologies: Java, JavaFX, HTML, CSS, JavaScript, GitHub, Bootstrap.
- Key Features: Project tracking, daily updates, file-based persistence, responsive website design.
- Role: Full-stack development, collaborated in a 5-member multicultural team following waterfall method , used GitHub for version control.

Skills

Java | C# | Blazor | JavaScript | HTML | CSS | Object-Oriented Programming | MVVM | PostgreSQL

Professional Experience

2022

Towada, Japan

Nursing Care

- My experience as a Nursing Care Assistant has enhanced my compassion and ability to work effectively under pressure, making me a dedicated and empathetic candidate for any team.

Languages
